

DEPARTMENT OF COMPUTER SCIENCE & ENGINEERING

Discover. Learn. Empower.

Experiment No: 9

Student Name: Archita Srivastava

UID: 23BCS12459

Branch: BE CSE

Section/Group: 23BCS_KRG-2_B

Semester: 6th

Date of Performance: 19/04/2026

Subject Name: System Design

Subject Code: 23CSH-314

1- Aim - To design a scalable Online Movie Ticket Booking System

2- Requirements: Functional & Non-Functional

A- Functional Requirement o User Registration & Authentication: Users can sign up, log in, and manage profiles using email/password or OAuth (Google, Facebook).

- o Movie Browsing: Users can browse currently running movies, upcoming releases, with filters by genre, language, city, and rating.
- o Theatre & Showtime Selection: Users can view all theatres in a city showing a selected movie along with available showtimes.
- o Seat Selection: Users can interactively view the seat layout (Regular, Premium, Recliner) and select available seats in real-time.
- o Booking & Payment: Users can book selected seats, proceed to payment via multiple gateways (UPI, Cards, Net Banking, Wallets), and receive booking confirmation.
- o Booking History & Tickets: Users can view past and upcoming bookings, download e-tickets, and cancel bookings within the allowed window.
- o Notifications: Users receive email and SMS notifications on successful bookings, cancellations, and upcoming show reminders.

B- Non-Functional Requirement o 50–100 million users; 10K concurrent bookings/sec during peak.

- o Availability: 99.99% uptime (< 1 hr downtime/year)
- o Strong consistency for seat booking; Eventual for reviews
- o < 200ms for search; < 500ms for seat lock
- o Fault-tolerance: No single point of failure; auto-failover

3- Core-entities of System

- o User
- o Movie
- o Theatre
- o Seats
- o Booking
- o Payment
- o Review

DEPARTMENT OF COMPUTER SCIENCE & ENGINEERING

4- API endpoint creation

1. User-Onboarding

POST /api/users/register
POST /api/users/login
PUT /api/users/{userID}/profile
GET /api/users/{userID}/bookings

2. Movie Browsing & Search

GET /api/movies
GET /api/movies/{movieID}
GET /api/movies/search
GET /api/movies/{movieID}/shows

3. Seat Selection & Booking GET /api/shows/{showID}/seats POST /api/shows/{showID}/lock

POST /api/bookings
GET /api/bookings/{bookingID}
DELETE /api/bookings/{bookingID}

4. Payment Service

POST /api/payments/initiate
POST /api/payments/webhook
GET /api/payments/{paymentID}

5- High-Level Design
